

ARNOLD® electric wheel chock controlbox

part numbers: 706180032, 706180037 (wireless)

Technical data

- Material: plastic, with abrasion-resistant front foil
- Main switch used as emergency stop switch
- Height approx. 260 mm
- Width approx. 165 mm
- Depth including screwing approx. 80 mm
- Operating voltage 230 V AC
- Power input max. 1.5 A
- protection class IP64

Features

- A red and a green, bright, well visible multi-LED-lamp to show status signal for loading personnel
- Lockable main switch
- Key switch to bypass interlocking of ramp and/or gate in case of a failure
- End-of-loading button for explicit clearance of the loading place at the end of loading
- Possibility of connection for an outer or inner traffic light (230 VAC or 24 VDC)
- Potential-free pins for ramp and/or gate interlocking
- Over 25 pre-defined processes, depending on selected options, without special programming selectable.
